

Design the Perfect Classroom

Close your eyes for a minute and imagine you were in the world's best, most perfect classroom. It might help to try to answer these questions:

- What way would your idea classroom be set up – chairs, tables etc?
- What would be on the walls?
- What about things like books, art supplies, whiteboards, computers/tablets etc?
- Who are the people in your ideal classroom, and what would they be doing?
- What would you like to learn about in your ideal classroom, how would this learning happen (meaning - what would it look like)?
- What would be happening outside of the classroom windows or doors?

Using your ideas as inspiration create your perfect classroom by doing one or a mixture of the following things:

- Draw a picture
- Paint a picture
- Construct a cardboard, clay or playdough model
- Make a collage using old magazines, newspapers or anything else you can find

As you create your perfect classroom, ask yourself if the pupils in Guava Primary school would create something similar.

Now, write a short explanation of how your finished perfect classroom might help you and other children get a good (quality) education.

Show your finished classroom and explanation to your family and ask them to give you two stars (for 2 things you did well) and a wish (for one thing you could think about adding or improving).
